DETAILED ACTION

A telephone call was made to Eugene Mar on 3/18/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a method of manufacture for a motor, classified in class 310, subclass 42.
- II. Claims 5-8, drawn to motor structure, classified in class 310, subclass 254.

Inventions of group 1 and group 2 are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a stator for a direct current motor having brushes and the product can be made by winding a coil set, mounting one pole plate at one end of the coil set, mounting a combination member on the outside or the inside of the pole plate and finally mounting the second pole plate.
